

The platform for your future

What is boba?

Boba or bubble which can be seen in the most popular drink in Taiwan called milktea. "Boba" itself refers to tapioca balls made from the cassava root. They are cooked in sugar and water until they reach a chewy consistency. Boba tea was developed by Liu Han-Chieh and Lin Hsiu Hui in Taichung, Taiwan during the 1980's. Lin Han-Chieh came up with the idea of milk tea after seeing how the Japanese added milk to their coffee. The new milk tea boosted the popularity of his teahouse immensely and Lin Hsiu Hui, who was product manager at the time, created the pearls by combining tapioca ball and sweetened pudding with the iced tea. Since then, the popularity of boba has spread from Southeast and East Asian countries to mainly the US and Canada.

What is Bobachain?

- Bobachain (BOBA) is the masternode based coin that is dedicated to boba drinks.
- We have a complete ecosystem for the BOBA itself so the coin will generate value as the time passed.
- We want to become a main currency that is used in Boba stores and also expand to other kind of beverage stores also. Our vision is providing a fast and good way to pay for your drink with a simple app on your phone so you don't have to carry your wallet and paper money with you every time you want to buy a drink.

Problem with Boba store

This is not only the solely problem with only Boba stores but also every other coffee stores, and tea stores. The necessary of having more choices for customer to pay their drinks and other stuffs in store make us think of creating BOBA.

Our solutions

Unlike the traditional way to pay for your drinks by cash or card. Bobachain develop the app wallet dedicated to BOBA currency in order for customers pay their favorite drinks simply through BOBA wallet.

What we develop:

In order to do this we will build our BOBA wallet for both android and IOS so customer can use these wallet to send BOBA to store wallet and pay for their drinks.

What more?

- We want to partnership with store owners from around the globe in order to integrate our BOBA wallet to their store, not limit to boba stores only but other drink stores.
- Another big development step that we are going to make is building the franchising platform using BOBA as the main currency. In this way, we will create a healthy ecosystem for the BOBA coin.

Franchise market

- Franchise is when an investor seeking for investing their money into building their own store using an established brand name. In this way, both franchisee and franchiser share the benefits.
- Franchisee will be benefited from owning an established well-known brand name with a formed business structure model. Franchisee will have their own business that require less or no skills/experiences in the brand name that they chose. All of this will be taken care by franchiser.
- Franchiser is the one who own the brand name. The partnership between 2 parties will help to promote their own brand name wide spread. Franchiser also benefit from earning royal fees that they will take as a small percentage of sale revenue from franchisee.

What we bring?

- Our vision is to bring franchisee and franchiser together by building a franchising platform that will utilize our BOBA as the payment gateway. We will help to connect both business owners and investors from around the world in our platform.
- Using our platform, people won't have to waste time searching around for their partnership anymore. All of the franchiser and franchisee will be connected through our developed platform.

Use cases of the platform

- Basically, the business owner who want to franchise their business and promote their franchise with investor will post an advertisement on our platform. In the ad, there will be the brand name of the business, short introduction of the business and the contacts. In this way, whenever investor come to the platform, they can search for the business they want and see the ads that related to that areas.
- Price of the franchise could be put by franchiser to be referenced but the contact info of the person in charged of doing franchise will be hidden. A small fee will be collected from the investor if they want to connect to the “private room” with the franchiser. We also collect small fee from franchiser to post their ads. This way we will reduce the spam ads on our platform.

Coin specs

Name:	Boba Chain
Symbol:	BOBA
MN Collateral:	1,000 BOBA
Block Reward:	20 BOBA
Block Reward:	50% PoW / 50% MN
PoW Algo:	Lyra2z
Block time:	120 Seconds
Halving:	12 Months
Max Supply:	21,000,000 BOBA
Premine:	4%
